

Gib omnicore Enterprise

Feature-rich Dispatch for Large Organizations

MED-LGE Org
100+ Operators
200+ Channels

Why omnicore Enterprise?

Mega Reliable by Design

Natural redundancy through distributed architecture

Business Intelligence

Operational productivity and safety metrics all in one

Cloud, Site or Data Center

Deploy how it suits you best

Easy to Use

With a super customizable layout

Overview

Next Generation Dispatch

The brand new **omnicore** console is the next generation in scalable enterprise dispatch management and can be hosted on premises, in the cloud or a data center.

An evolution of popular **omnicore** radio dispatch technologies **altusomni** and **RediTALK-Flex**, **omnicore** combines the best of both worlds, and is a flexible, easy to use system for small organizations and large enterprises alike.

The central server delivers the information you need, lets you make instant changes on-the-fly and is unbelievably reliable.

It just works.

Upgrading

Making the Transition

For peace of mind, the upgrade to **omnicore** is easy: it is compatible with existing tried and proven Omnitronics gateways.

It also features **omnicoreconnect** interoperability for those wanting to connect people, technologies, protocols and manufacturers.

Contacts

Automagically centralize your contacts databases into one

Easy to Use

Touchscreen interface with a configurable layout

Location Services

Geofencing, alarms, route playback

Reporting

Sophisticated reporting and analytics into existing systems

On-the-Fly

Central changes are instantly updated

Interoperability

Interconnect people, protocols, technologies & manufacturers

Connections

Digital & legacy analog radio systems, phone, paging, SIP

High Availability

Fully redundant, data replication, clustering & 24/7/365 support

A Dispatch Powerhouse

omnicore Enterprise Dispatch Technical Specifications

Cloud, Site and/or Data Center Deployment	Designed to be run and managed in a virtual machine environment
Multi-Vendor Support	Offers interoperability between digital and analog technology from an ever-evolving list of radio vendors
Simple Licensing	All licensing stored on central server Users can access their profile from any device / location connected to the network
High Availability & Redundancy	Radio dispatch Consoles continue to work during server unavailability. Central server can be virtualised, or setup within clustered environment for mega reliability.
Central Configuration & Monitoring	Easy to use web based configuration interface Centralized server model for licensing and operator management, channels and installed feature packs Updates / changes on the server are pushed to connected consoles in real-time
Real-Time Dashboard	Configurable web display for real-time operational system information
Reporting & Analytics	All system information available via REST API Compatible with industry standard reporting tools
Customizable 1-Click Workflows	Customizable task buttons to trigger simple & complex (multi-step) workflow actions with a single operator click or by an external source
Public Safety Grade Rapid Recall	Advanced instant voice recording and playback Locally stored audio recordings of all calls Call history with each radio channel audio saved individually
USA Public Safety	Includes Manual Paging, Instant Call, Stacked Paging and Alert Tones
RTT Call Queue	Choose call requests from list, close completed calls, make notes against responded calls, forward completed responses to colleagues
Activate CCTV, Video or Web URL feed from Console	Open a web page, executable file/application, or live CCTV feed as a separate window, or window within Console GUI
Integrated Location and Real-Time Mapping	Configurable real-time display of devices on map Customizable icon and identity display, geofences and key operator dispatch functions directly from map
